Mockup Review

Hi Madi! Overall, I like the initial colors and composition but I think the concept could be made stronger. Here are some things I noticed:

- The home page should be mostly image-based, at least one huge picture, and any information should be smaller and more supplementary
- Menu bar/header takes up too much space right now
- I think an accent color is needed for emphasis in some places, like the white text does work for legibility but it doesn't really stand out
- Make sure the images, titles, and text boxes have consistent alignment across each of the pages
- I'd like at least some of the information to be arranged in a more artsy way, maybe using some graphic lines or shapes to make it feel less like a history site and more like making the viewer want to eat this food/drink

Good job :)
